Education

University of California, Irvine 2021 - 2025

Bachelor of Science in Computer Science - **GPA: 3.94 (Cum Laude)**

Experience

Founding Software Engineer, *TakeBridge* (*San Francisco, CA*) May 2025 - Present

- Led 0→1 build of a B2B SaaS agentic automation platform, **reaching 50+ organic signups** and shipping in Agile weekly sprints.
- Owned the execution layer, delivering async REST + SSE services and an Electron (Vite + React) operator UI that supports **1,000+ concurrent requests**, released via GitHub Actions CI/CD.
- **Reduced inference spend by 70%** by implementing shared multi-agent context/state with LangChain and running self-hosted multimodal inference on vLLM.
- Improved platform reliability and recoverability by building a FastAPI control plane that provisions user-scoped AWS EC2 sandboxes, persists state in PostgreSQL, and stores artifacts in Cloudflare R2, **cutting stored state size by 50%**.

Software Engineer Intern, *Cognitus (IBM Company)* *(Dallas, TX)* June 2024 - Sep 2024

- Architected and shipped features in a Python FastAPI + SQLAlchemy microservice CLM platform used by **10+ SAP federal contracting clients**, driving delivery in Agile sprints with GitLab PR reviews.
- Engineered and validated mission-critical 30+ REST APIs on PostgreSQL + Redis, and operationalized Docker/Docker Compose integration testing aligned to GitLab CI/CD, **reducing workflow/UI inconsistencies by 25%**.
- Designed a multilingual (i18n) API messaging framework via middleware + message-key standardization, enabling localized responses across **30+ endpoints for 5+ international clients.**

Volunteer Software Engineer, *DMV Music Alliance* *(Washington, DC)* May 2025 - Present

- Led development of user-facing PHP/JavaScript web platforms, serving **100+ monthly active users**, including a Job Board that **improved recruiting turnaround by 35%.**
- Architected automation and data-ingestion pipelines processing 100+ records using Python, Zapier, and REST APIs/webhooks, **cutting manual operations by 80%**.

Software Developer, *UCI CubeSat* *(Irvine, CA)* Aug 2024 - Dec 2024

- Architected flight software requirements and modular microservice design for a 2U CubeSat, **defining 20+ UML requirements** and integrating NASA F' with FreeRTOS to **accelerate avionics, power, and comms integration by 25%.**

Bioinformatics Research Assistant, *University of California, Irvine (Irvine, CA)* ***Jan 2024 - Aug 2024***

- Deployed EdgeLake (open-source decentralized edge database) on biological IoT edge devices, **reducing organoid detection query latency 40%,** and built a data visualization pipeline that **cut cross-experiment comparison time by 80%.**

Projects

ASRA - Deep-Research Agent for Startup Validation **Python | Next.js | LangGraph | ChromaDB | Docker**

- Architected a **LangGraph** multi-agent research engine on **FastAPI** that converts startup ideas into dimensioned research plans.
- Shipped a **Dockerized Next.js + PostgreSQL** reporting UI that synthesizes evidence-backed reports from 50+ URLs/run.
- Implemented an evidence pipeline using **OpenAI embeddings** + **ChromaDB top-k retrieval** with an 80% relevance gate.
- Engineered memory/context controls to **cut token usage by 50%** while preserving research coverage.

GenResume - GitHub Resume Recommendation Engine **Python | PostgreSQL | React | AWS | RAG | OAuth 2.0**

- Shipped a **GitHub-OAuth** resume recommendation web app that ranks a user's repos into job-specific projects/bullets, **cutting manual tailoring time by 80%**.
- Designed a semantic ranking pipeline using Tree-sitter parsing and pgvector retrieval, **achieving 85% accuracy** aligning recommended evidence to job requirements.
- Deployed on **AWS Kubernetes** by containerizing services with **Docker**, defining **Kubernetes** manifests with sticky sessions, configuring **PostgreSQL master–slave replication** with connection pooling, and load-testing search to **476 requests/min.**

Technical Skills

Languages: Python, Java, C++, C, JavaScript, SQL (MySQL, PostgreSQL, SQLite), NoSQL, R, HTML, CSS, TypeScript

Developer Tools: Git, AWS, Postman, Docker, Kubernetes, Azure, Jira, GCP, Linux, vLLM, UML

Libraries/Frameworks: FastAPI, Flask, Tomcat, React, Next.js, SQLAlchemy, Tailwind CSS, NumPy, Pandas, Redis, Node.js, JWT, OAuth 2.0, LangGraph.
